

Conax focuses on providing a high level of service and support to our customers, including competence on Conax operations.

Optimize your operation

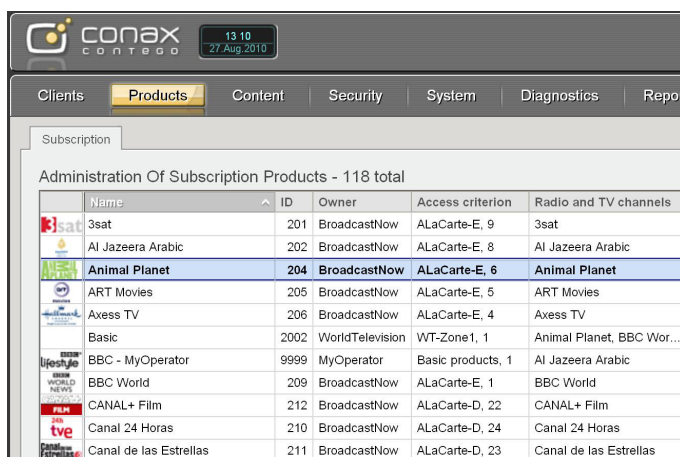

The Contego™ Operations Training course offered by Conax Academy is a tailor made course designed to assist our customers in increasing efficiency and reducing downtime problems and operational costs. Contego™ Operations Training is a comprehensive three-day training course that provides the tools and know-how to operate, administrate and maintain a Conax system. The course focuses on daily operation, configuration and administration of a Conax subscription and pairing system. The training provides an understanding of Conditional Access principles and the Conax product offering. Hands-on practices will enhance the students' outcome of the training.

Target audience: DTV Operators and Conax Partners

Training duration: 3 days (9am - 4pm)

Recommended pre-requisites: DVB

Price: 1500 Euro per person incl. training, lunch & documentation
